LUXA

LDDR-M Multichannel Laser

Light Sources

The LDDR-M supplies multiple optical wavelength channels. Channel assignment and output characteristics should be matched to the measurement system.

Technical specifications

Number of channels	16
Wavelength adjustment range (nm)	>±1
Output power per channel (dBm)	>0
Fiber type	Single-mode
Optical connector type	FC/APC
Supply voltage (VAC)	200 to 240
