Narrow-Linewidth Laser Source (1 MHz/200 kHz)

Test Light Sources

This narrow-linewidth optical source is available in different linewidth configurations for coherent measurements. Specify the linewidth and center wavelength together.

Technical specifications

Operating wavelength (Customizable) (nm)	1550 typ.
Output power (mW)	10 min. / 1000 max.
Short-term stability (15 Minutes) (dB)	0.02 max.
Long-term stability (8 Hours) (dB)	0.05 max.
Fiber type	SMF-28e
Fiber output termination	FC/APC
Supply voltage (V)	DC 5
Supply voltage (V)	AC 220
