ZL15 Elastomeric Watertight Connector

Watertight Connectors

The ZL15 elastomeric connector provides a sealed electrical interface for underwater equipment. Select the contact arrangement, cable and mating receptacle together.

Technical specifications

Hydrostatic pressure resistance	60 MPa
Nominal voltage	600 VDC/AC
Data cable nominal voltage	250 VDC/AC
Current rating per contact (A)	≤40
Wet-mating cycles	>500
Operating temperature in water (°C)	-4 to +60
Operating temperature in air (°C)	-40 to +60
