ZL40 Elastomeric Watertight Connector

Watertight Connectors

The ZL40 elastomeric connector is intended for underwater equipment connections. Select the contact configuration and cable assembly against the equipment interface.

Technical specifications

Hydrostatic pressure resistance	60 MPa
Nominal voltage	600 VDC/AC
Data cable nominal voltage	250 VDC/AC
Current rating per contact (A)	≤40
Wet-mating cycles	>500
Operating temperature in water (°C)	-4 to +60
Operating temperature in air (°C)	-40 to +60
